

## Evaluating Expressions Problems

Underline and Circle where necessary!!

1. Evaluate following expression with given values.

$$\frac{(x+7)}{6} + 8 \text{ for } x = 4$$

2. Evaluate following expression with given values.

$$\frac{(8k-4j)}{4} \text{ for } k = 6, j = 4$$

3. Evaluate following expression with given values.

$$\frac{(2y-7)}{3} \text{ for } y = 6$$

4. Evaluate following expression with given values.

$$5s^2 + 9t - 8 \text{ for } s = 5, t = 3$$

5. Evaluate following expression with given values.

$$3(p + 4) + 5q \text{ for } p = 4, q = 2$$

6. Evaluate following expression with given values.

$$8(3 + x) + 5 \text{ for } x = 4$$

7. Evaluate following expression with given values.

$$5a + 2b - 8 \text{ for } a = 3, b = 4$$

8. Evaluate following expression with given values.

$$2(8 + x) + 5 \text{ for } x = 6$$

9. Evaluate following expression with given values.

$$7x + 8 \text{ for } x = 3$$

10. Evaluate following expression with given values.

$$\frac{(x+9)}{6} + 2 \text{ for } x = 7$$
