Writing Fractions As Decimals Problems

Underline and Circle where necessary!!

1. Convert the fraction to a decimal, and determine the type of decimal: $\frac{-93}{50}$

2. Convert the fraction to a decimal, and determine the type of decimal: $\frac{12}{5}$

3. Convert the fraction to a decimal, and determine the type of decimal: $\frac{-4}{11}$

4. Convert the fraction to a decimal, and determine the type of decimal: $\frac{-80}{9}$

5. Convert the fraction to a decimal, and determine the type of decimal: $\frac{-41}{11}$

6. Convert the fraction to a decimal, and determine the type of decimal: $\frac{-52}{66}$

7. Convert the fraction to a decimal, and determine the type of decimal: $\frac{66}{4}$

9. Convert the fraction to a decimal, and determine the type of decimal: $\frac{83}{18}$

10. Convert the fraction to a decimal, and determine the type of decimal: $\frac{59}{16}$

11. Convert the fraction to a decimal, and determine the type of decimal: $\frac{77}{6}$

14. Convert the fraction to a decimal, and determine the type of decimal: $\frac{17}{51}$

15. Convert the fraction to a decimal, and determine the type of decimal: $\frac{-47}{99}$

18. Convert the fraction to a decimal, and determine the type of decimal:
$$\frac{-2}{32}$$

19. Convert the fraction to a decimal, and determine the type of decimal:
$$\frac{-89}{25}$$

22. Convert the fraction to a decimal, and determine the type of decimal: $\frac{-47}{30}$

23. Convert the fraction to a decimal, and determine the type of decimal: $\frac{-98}{80}$

25. Convert the fraction to a decimal, and determine the type of decimal: $\frac{-89}{50}$

26. Convert the fraction to a decimal, and determine the type of decimal: $\frac{92}{23}$

27. Convert the fraction to a decimal, and determine the type of decimal: $\frac{17}{90}$

30. Convert the fraction to a decimal, and determine the type of decimal: $\frac{100}{3}$

31. Convert the fraction to a decimal, and determine the type of decimal: $\frac{24}{16}$

34. Convert the fraction to a decimal, and determine the type of decimal:
$$\frac{79}{20}$$

35. Convert the fraction to a decimal, and determine the type of decimal: $\frac{-67}{5}$

38. Convert the fraction to a decimal, and determine the type of decimal:
$$\frac{21}{4}$$

39. Convert the fraction to a decimal, and determine the type of decimal: $\frac{-85}{11}$

42. Convert the fraction to a decimal, and determine the type of decimal:
$$\frac{-53}{22}$$

43. Convert the fraction to a decimal, and determine the type of decimal: $\frac{98}{75}$

46. Convert the fraction to a decimal, and determine the type of decimal:
$$\frac{-20}{22}$$

47. Convert the fraction to a decimal, and determine the type of decimal: $\frac{57}{36}$

50. Convert the fraction to a decimal, and determine the type of decimal: $\frac{-56}{14}$
