Adding And Subtracting Fractions Problems

Underline and Circle where necessary!!

1. Subtract fractions and simplify if possible.

$$\frac{8}{9} - \frac{19}{5} =$$

2. Add fractions and simplify if possible.

$$\frac{6}{11} + \frac{18}{9} =$$

3. Add fractions and simplify if possible.

$$\frac{9}{6} + \frac{6}{2} =$$

4. Add fractions and simplify if possible.

$$\frac{15}{18} + \frac{17}{15} =$$

5. Subtract fractions and simplify if possible.

$$\frac{5}{12} - \frac{8}{6} =$$

6. Add fractions and simplify if possible.

$$\frac{13}{7} + \frac{12}{2} =$$

7. Subtract fractions and simplify if possible.

$$\frac{6}{2} - \frac{4}{14} =$$

8. Subtract fractions and simplify if possible.

$$\frac{15}{4} - \frac{9}{20} =$$

9. Add fractions and simplify if possible.

$$\frac{18}{6} + \frac{6}{11} =$$

10. Add fractions and simplify if possible.

$$\frac{13}{9} + \frac{18}{15} =$$
